POWERING INDUSTRIES. ENABLING EXCELLENCE.

For over three decades, XCEL has been at the foerfront of delivering high-performance Commercial and Industrial laundry equipment that businesses across India rely on every single day.

OUR HEAD OFFICE & MANUFACTURING PLANT

Xcel Stiro Private Limited
Faridabad, Haryana, India

OUR OBJECTIVE

To deliver reliable, efficient and innovative laundry solutions that help businesses achieve maximum productivity with minimum downtime and operating costs.

OUR CUSTOMERS

We serve a wide range of industries including hotels, hospitals, garment factories, commercial laundries, industrial facilities, institutions and many others across India.

OUR SERVICES

From consultation to installation, after-sales support and preventive maintenance – our nationwide network ensures you get the right support, right when you need it.

OUR PRODUCTS

A comprehensive range of industrial & commercial laundry equipment – Washing, Drying, Ironing, Dry-cleaning, Flat Work, Steam Finishing and more – engineered for performance and built to last.

MADE FOR INDIA. MADE IN INDIA.

Proudly manufactured in India with precision engineering, premium components and stringent quality standards – supporting Indian businesses and the nation's self-reliance.

MADE IN INDIA

BUILT WITH PRIDE.
DRIVING THE NATION FORWARD.

At XCEL, every machine reflects our commitment to quality, innovation and customer success.
We don't just build machines,
we build long-term partnerships.

WASHER EXTRACTOR

HIGH PERFORMANCE. EVERY WASH CYCLE.

The XCEL Industrial Washer Extractor combines washing & high-speed extraction to reduce residual moisture, shorten processing time & increase productivity making it ideal for modern commercial laundries.

FEATURES

- 2 in 1, washing with high speed extraction for easier loading & unloading of garments.
- Manufactured mainly from premium-grade Stainless Steel 304.
- Fully automatic programmable controls reduce manual intervention and operator dependency.
- Create, store & manage customised wash & extraction programmes for different fabric types.
- Variable frequency drive enables adjustable basket speed while reducing power consumption.
- Automatic detergent dosing through PLC control at the operator's command.
- Auto timing, auto reverse, auto liquid selection & digital temperature control.
  Auto operation of water & drain valves, safety devices against single phasing & motor overload.
- CNC-cut, laser-welded framework provides high structural strength and long-term durability.
- Low water consumption reduces chemical, utility and overall operating costs.

HIGH SPEED EXTRACTION

ELECTRIC AND STEAM HEATED VARIANTS

MODEL	CAPACITY	ESTIMATED DAILY OUTPUT	PERFECT CHOICE IF YOU
WE 15	15 KG	Up to 150 kg/day	Need an efficient solution for low-volume operations.
WE 30	30 KG	150–350 kg/day	Are starting a new laundry and need higher output.
WE 50	50 KG	350–700 kg/day	Handle heavy daily laundry across multiple shifts.
WE 100	100 KG	700 kg+/day	Require maximum productivity for continuous operations.

COMPLETE WASH CYCLE

POWERFUL WASH. HIGH SPEED EXTRACTION

XCEL

BUILT FOR PERFORMANCE.
ENGINEERED TO LAST.

CYCLE EXPLAINED, STEP BY STEP

1 POWERFUL WASH

Optimized basket movement with water and detergent ensures thorough cleaning while protecting fabric quality.

2 HIGH-SPEED EXTRACTION

High-speed extraction force removes maximum water through precision perforations in the stainless steel basket.

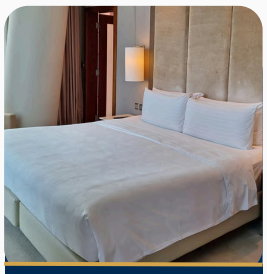

3 READY FOR DRYER

Garments come out almost dry with minimal residual moisture, reducing drying time and saving energy.

- Water & Detergent Penetrate Fabric
- Multi-Directional Drum Action
- Effective Cleaning of Every Load
- Basket Spins at High Speed
- Water is Expelled Through Perforations
- Maximum Moisture Removal
- Clean, Almost Dry Garments Ready for Dryer

FRONT LOADING
WASHING MACHINE

POWER THROUGH EVERY LOAD.

The XCEL Front Loading Washing Machine combines beater-action washing, programmable cycles, stainless steel construction and optimized water consumption for reliable performance across laundry industries.

FEATURES

- Create, store & manage customised wash programmes for continuous cycles.
- Mainly 304 grade stainless steel construction, balanced washing basket with CNC-embossed perforations for improved fluid circulation.
- Automatic forward and reverse basket rotation to enhance detergent penetration.
- The Stainless Steel panels are mounted on channel frames, comes with total argon welding for complete durability.
- Transparent water-level gauge for visual monitoring, along with butterfly valves for rapid draining and ball valves for quick water filling.
- Equipped with digital temperature control through the PLC for accurate temperature setting.
- Comes with a heavy-duty motor coupled to a shaft with a key-locked main pulley, ensuring smooth and reliable basket drive. An optional Variable Frequency Drive is available for variable-speed control.

MULTIPLE HEATING OPTIONS

Choose the heating method that suits your operations

ELECTRIC | STEAM | DIESEL | PNG / LPG

MODEL	CAPACITY	PERFECT CHOICE IF YOU
WF 15	15 KG	Need a compact, high-performance washing solution for everyday laundry operations.
WF 30	30 KG	Are increasing laundry capacity while maintaining fast turnaround times.
WF 60	60 KG	Process consistently medium to high laundry volumes & require reliable performance.
WF 120	120 KG	Require greater washing capacity to support demanding operational workloads.
WF 200	200 KG	Need maximum productivity for continuous, large-scale laundry processing.

HYDRO EXTRACTOR

MAXIMUM MOISTURE REMOVAL. MINIMUM DRYING TIME.

The XCEL Hydro Extractor delivers high-speed centrifugal extraction to significantly reduce residual moisture, enabling faster drying, lower energy consumption and higher laundry processing capacity.

FEATURES

- Operates at speeds up to 900 RPM to rapidly remove residual moisture.
- 304 grade stainless steel inner and outer baskets for resistance against corrosion.
- High-efficiency direct drive system for reliable power transmission.
- DC injection braking for rapid basket deceleration & controlled stopping.
- Precision-balanced basket and shock-absorbing support system for stable operation with reduced vibration.
- Available with an optional interlocking safety lid lock that prevents lid opening until the basket has completely stopped.
- Separately mounted electrical panel positioned away from the extraction zone for safety againts sparking.
- Features a CNC embossed stainless steel basket with precision perforations for efficient water discharge.

DRYING TUMBLER

MOISTURE OUT. PERFORMANCE IN.

The XCEL Drying Tumbler combines efficient airflow, programmable temperature control and stainless steel basket construction for dependable drying performance throughout the year.

FEATURES

- Heavy-fabricated outer body with metallic paint and clear coating, epoxy-coated interior for rust protection and powder-coated front panels for long-lasting performance.
- Sliding lint screen positioned on the front panel for easy access and cleaning.
- Programmable Controller allows to create, store and manage customised drying programmes for continued cycles, preventing over-processing.
- Alternate forward and reverse basket rotation to improve heat distribution & reduce tangling.
- A thermally insulated double-wall drum with glass wool insulation to prevent heat loss, improving energy efficiency.
- Inner basket is manufactured from 304 grade stainless steel for rust resistance & long operational life.
- Employs a balanced centrifugal high-suction blower for efficient moisture evacuation and quiet operation.

MULTIPLE HEATING OPTIONS

Choose the heating method that suits your operations

CONSISTENT DRYING.

GENTLE ON FABRICS, TOUGH ON MOISTURE.

XCEL

BUILT FOR PERFORMANCE.
ENGINEERED TO LAST.

INSIDE EVERY DRYING CYCLE

HEATED AIR CIRCULATION

Heated air is continuously circulated through the rotating basket for effective and uniform exposure across the entire load.

CONTINUOUS MOISTURE REMOVAL

The suction exhaust system continuously evacuates moisture-laden air from the basket, maintaining effective airflow and accelerating moisture removal.

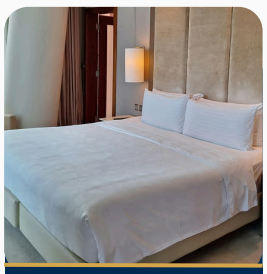

REVERSING DRUM ACTION

Automatic forward and reverse basket rotation continuously redistributes garments, prevents bunching & results in exposure to heated airflow.

APPAREL PROCESSING MACHINE

HIGH CAPACITY. PRECISE PROCESS CONTROL.

The XCEL Front Loading Apparel Washing Machine combines precise washing control, temperature control, VFD-regulated basket speeds and controlled chemical dosing to deliver repeatable batches.

FEATURES

- Available in 100 kg & 200 kg capacities for high-volume garment processing & batch consistency.
- Create, store & manage customised wash programmes for different garment types.
- Motor with variable frequency control device that allows gentle garment handling to intensive denim washing processing.
- Manufactured from premium- grade Stainless Steel 304. CNC-Cut & precision laser-welded framework for superior structural strength.
- Comes with Programmable water level management.
- Chemical feeding system is operated automatically by PLC & comes with pump & stainless steel chemical feed container.
- Water Intlet and Water Drain are automatically controlled through the PLC.
- Small door in main door for checking.
- Minimum water consumption results in lower chemical & utility consumption, reducing overall operating costs.

SOFTENER WASH
WITH DRYER

SOFTENING AND DRYING. ONE COMPLETE CYCLE.

The XCEL Softener Washer with Inbuilt Dryer provides controlled softener mist application and programmable drying for consistent fabric treatment and a uniform, ultra soft garment feel.

FEATURES

- Programmable Controller allows to create, store and manage customised drying programmes.
- Provides 90% water savings while delivering a soft, smooth hand feel of the garments.
- Comes with a stainless steel tank for water-chemical preparation and softener spray mist application.
- A thermally insulated double-wall drum with glass wool insulation to prevent heat loss.
- Alternate forward and reverse basket rotation promotes even softener mist application for a complete softening effect.
- Mainly constructed using 304 grade stainless steel including the outer panels, providing resistance to chemicals & processing additives, with epoxy-coated inner body for rust protection.
- Fitted with self-aligning bearings to support radial and axial loads during continuous basket operation.

UPTO 90% WATER SAVINGS

MULTIPLE HEATING OPTIONS

ADVANCED PROCESSING. BETTER HAND FEEL.

SOFTEN. DRY. COMPLETE FABRIC CARE.

XCEL

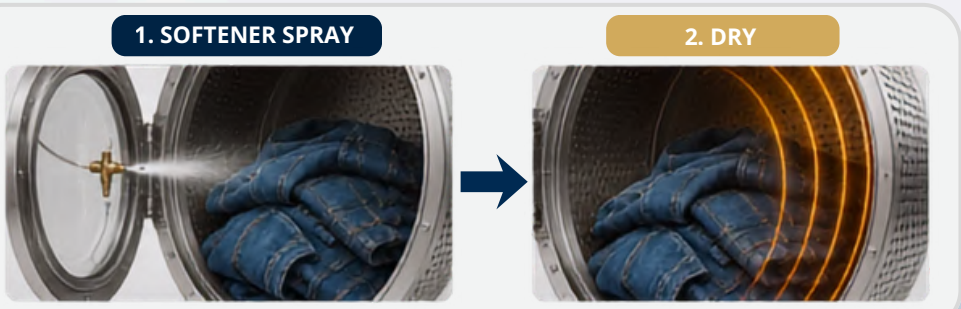

BUILT FOR PERFORMANCE.
ENGINEERED TO LAST.

HOW IT WORKS

1. **LOAD**
   Place garments or made-up textiles inside the stainless steel basket.
2. **SOFT WASH**
   A precision spray system applies softening agent while saving up to **90%** water.
3. **EXTRACTION-FREE PROCESS**
   The process eliminates centrifugal extraction, ensuring the softness stays within the fabric instead of being spun away.
4. **INBUILT DRYING**
   The integrated drying tumbler removes moisture automatically in the same basket without any extra handling.
5. **READY FOR USE**
   Garments emerge evenly dried while retaining their ultra soft hand feel.

*IMAGE FOR INDICATIVE PURPOSE ONLY

BEST SUITED FOR

FOR GARMENT EXPORT HOUSES

The machine delivers batch-to-batch consistency, helping garment manufacturers meet defined hand-feel for export orders.

FOR HOME TEXTILE & FURNISHING MANUFACTURERS

Softener application & inbuilt drying help achieve consistent softness & plush hand-feel across towels, bed linen and other premium home textile products.

FOR DENIM PROCESSING UNITS

Helps denim processors reduce process handling while offering consistent softness and hand-feel by streamlining softening & drying into a single controlled process.

WHY CHOOSE AN XCEL SOFTNER WASH WITH DRYER?

REDUCED PROCESS HANDLING
Softener treatment and drying in one process reduces intermediate handling

90% WATER SAVINGS
Reduce water consumption while achieving the required soft hand-feel

PROGRAMMABLE PROCESS CONTROL
Customizable process cycles provide repeatable treatment

THERMALLY INSULATED DRUM
Double-wall insulated drum to prevent heat loss & to improve energy efficiency

EASY SERVICING & MAINTAINANCE
Made for easy service and maintainance

PERC
DRYCLEAN MACHINE

AUTOMATED CLEANING. EFFICIENT SOLVENT RECOVERY.

FEATURES

- Programmable computer control, memory function & manual override functions.
- Major solvent-contact components are manufactured from Stainless Steel 304 Grade.
- 03 storage tanks for controlled solvent handling & tank-to-tank transfer throughout cycles.
- Built-in distillation recovers and purifies solvent for continued solvent reuse.
- Integrated drying and recovery systems remove residual solvent while efficiently recovering solvent.
- Adjustable basket speed for controlled processing of garments, including delicate fabrics requiring gentler action.
- Robust hub-mounted basket for stable operation & improved imbalance resistance during extraction.
- Large door openings for garment loading, unloading and convenient still maintenance access.
- Large button trap collects solid contaminants, protecting downstream components within the solvent circuit.
- Double air-filter for air filtration throughout drying and solvent recovery systems

FLAT WORK
IRONER

CRSIP LINEN. EVERY TIME.

The XCEL Flat Work Ironer delivers fast, consistent linen finishing with precision temperature control, variable speed operation and heavy-duty Stainless Steel 304 roller, maximizing productivity across high-volume commercial laundry operations.

FEATURES

- Multiple Working Widths- Available in 2000 MM and 3000 MM to suit multiple linen sizes.
- Available in Electric, Steam or Gas heating options.
- Integrated variable drive allows precise adjustment of roller speed according to linen type.
- Stainless steel 304 machine precisioned roller provides excellent corrosion resistance during continuous operation.
- Digital temperature control enables precise roller temperature adjustment for consistent heat and uniform linen finishing.
- Integrated safety guard prevents accidental contact with the heated roller.
- Large-Diameter Roller maximizes surface contact for improved heat transfer.

VACUUM IRONING TABLE

PROFESSIONAL GRADE. GARMENT FINISHING.

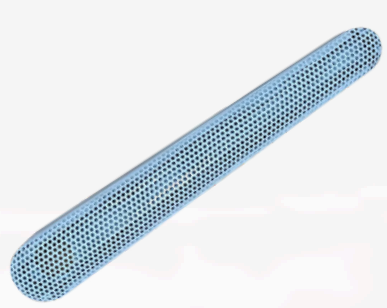

The XCEL Vacuum Ironing Table combines powerful suction with industrial steam iron compatibility to deliver consistent, professional-quality garment finishing across every batch.

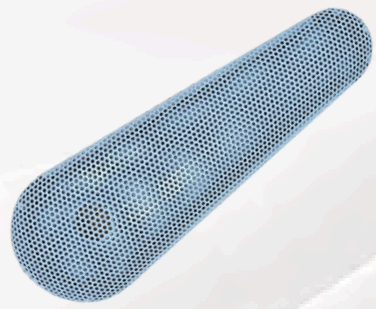

FEATURES

- High-performance suction draws garments evenly for smooth, professional results.
- Efficient table-top with uniform perforation prevents table wetting through thermostatically controlled surface elements.
- The top sheet is galvanized iron, powder coated for rust prevention.
- Premium foam provides a smooth, resilient ironing surface for consistent pressing quality.
- Table-top perforations are symmetrical for uniform suction on complete top.
- Supplied with a high-quality iron designed for uniform heat distribution, comfortable handling during extended working hours.
- Optional Universal and Sleeve Buck Arm attachments provide dedicated finishing surfaces for sleeves, cuffs, collars and other difficult-to-press areas.

OPTIONAL BUCK ATTACHMENTS

VACUUM IRONING TABLE

VT-20 EXTRA LARGE TABLE

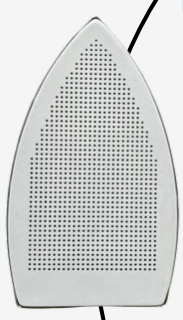

Extra-large tables simplify handling oversized garments. The bigger surfaces reduce garment repositioning and ensuring faster workflow.

FERRO

Imported Electric Steam Iron, Ergonomically designed base plate with long passage for optimum steam heating to provide absolutely dry steam. Anti-shock handle. Zero maintenance. Teflon shoe for shine prevention.

ALS

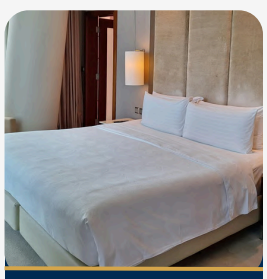

Imported All Steam Iron without element using steam to heat the base. Releases steam by pressing lever when desired. Heat Proof handle, steam volume adjustment.

ONLINE IRONING TABLE

AVAILABLE STANDALONE OR AS A COMPLETE WORKSTATION.

The XCEL Online Vacuum Table is available as a standalone unit or can be combined with a portable water heater, creating a compact, self-contained workstation for space-conscious garment finishing facilities.

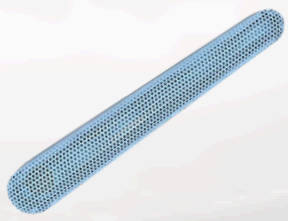

FEATURES

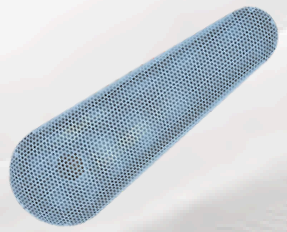

- High-performance suction draws garments evenly for smooth, professional results.
- Efficient table top with uniform perforation prevents table wetting through thermostatically controlled surface elements.
- The top sheet is galvanized iron, powder coated for rust prevention.
- Premium foam provides a smooth, resilient ironing surface for consistent pressing quality.
- Table top perforations are symmetrical for uniform suction on complete top.
- Supplied with a high-quality iron designed for uniform heat distribution, comfortable handling during extended working hours.
- Optional Universal and Sleeve Buck Arm attachments provide dedicated finishing surfaces for sleeves, cuffs, collars and other difficult-to-press areas.

Portable Water Heater with easy, manual water feeding for one Online Vacuum Table, ideal for operations in compact laundries & garment sampling applications.

FLAT BED **PRESS**

CONTROLLED PRESSURE. CRISP FINISHING.

The XCEL Flat Bed Press Machine features a pneumatically operated, pressure-controlled stainless steel heated upper buck and vacuum suction through the perforated lower surface for sharp creases and repeatable finishing results.

FEATURES

- Comes with an extra-wide pressing surface to accommodate large flat linens.
- 304-grade stainless steel upper buck for reliable performance under continuous heat and moisture exposure.
- Electrically heated upper buck with digital temperature control to maintain consistent surface temperature.
- Adjustable pneumatic pressure of the top buck delivers uniform pressure across the entire pressing surface.
- High-performance suction draws flat linen evenly across the ironing surface for smooth & consistent results.
- Foot pedal operation activates the pressing cycle, keeping both hands free for garment handling.

FORM FINISHER

SHARP FINISHES. MADE EFFORTLESS.

The XCEL Form Finisher is a multi functional machine designed to finish garments using steam and air. Ideal for shirts, jackets, uniforms and similar garments, it delivers fast & consistent finishing while reducing manual ironing and improves production efficiency.

FEATURES

- Combines steam and air inflation system that delivers a crisp finish without direct iron contact.
- Inflatable body form for finishing garments like Jackets, Shirts, Ladies dresses, Skirts, Embroidery & sequential garments.
- Pneumatically operated collar and cuff clamps keep garments securely positioned throughout the finishing cycle.
- Full-sleeve inflation technology simultaneously finishes both sleeves from shoulder to cuff.
- Integrated multi-function control panel enables timer-controlled operation of steam and air inflation.
- Adjustable shoulder assembly for easy adaptation to different garment sizes.

UPSTEAM
PRESSING TABLE

STEAM. SHAPE. FINISH.

The XCEL Knitwear Up-Steam Pressing Table delivers upward steam through a perforated pressing surface, ensuring deep fabric penetration and uniform finishing of knitted and woolen garments.

FEATURES

- Large 1825 × 1065 mm pressing surface provides ample working area for knitwear and woolen garments.
- Soft cushioned top buck provides gentle cushioning for delicate knitted fabrics during pressing.
- Equipped with independent foot-operated controls for activation of up-steam and vacuum functions.
- Delivers controlled upward steam through the perforated pressing surface for deep fibre penetration.
- Fitted with a powerful vacuum motor for reliable suction performance.
- Available with optional adjustable steam pressure control to regulate steam intensity according to different fabric types.

SEAM BUSTING **VACUUM TABLE**

PERFECT SEAMS. EVERY TROUSER.

The XCEL Seam Busting Vacuum Table is designed for seam setting in the trousers. A combination of steam, vacuum suction & a pneumatically operated seam buck that works together to produce stable seams.

FEATURES

- Pneumatically operated seam-holding arm with vacuum suction draws the trouser into position for seam setting.
- Equipped with a profiled trouser buck with a raised thigh that follows the natural trouser shape for consistent seam busting along the entire leg.
- Integrated foot controls enable convenient operation of the vacuum system and pneumatic mechanism.
- Supplied with an imported iron for precise seam setting across the entire trouser profile.
- Equipped with a dedicated exhaust chimney to channel humid air outside the machine.
- Comes fitted with a die-formed pressing buck that retains its profile even under continuous production conditions.

UTILITY
IRONING TABLE

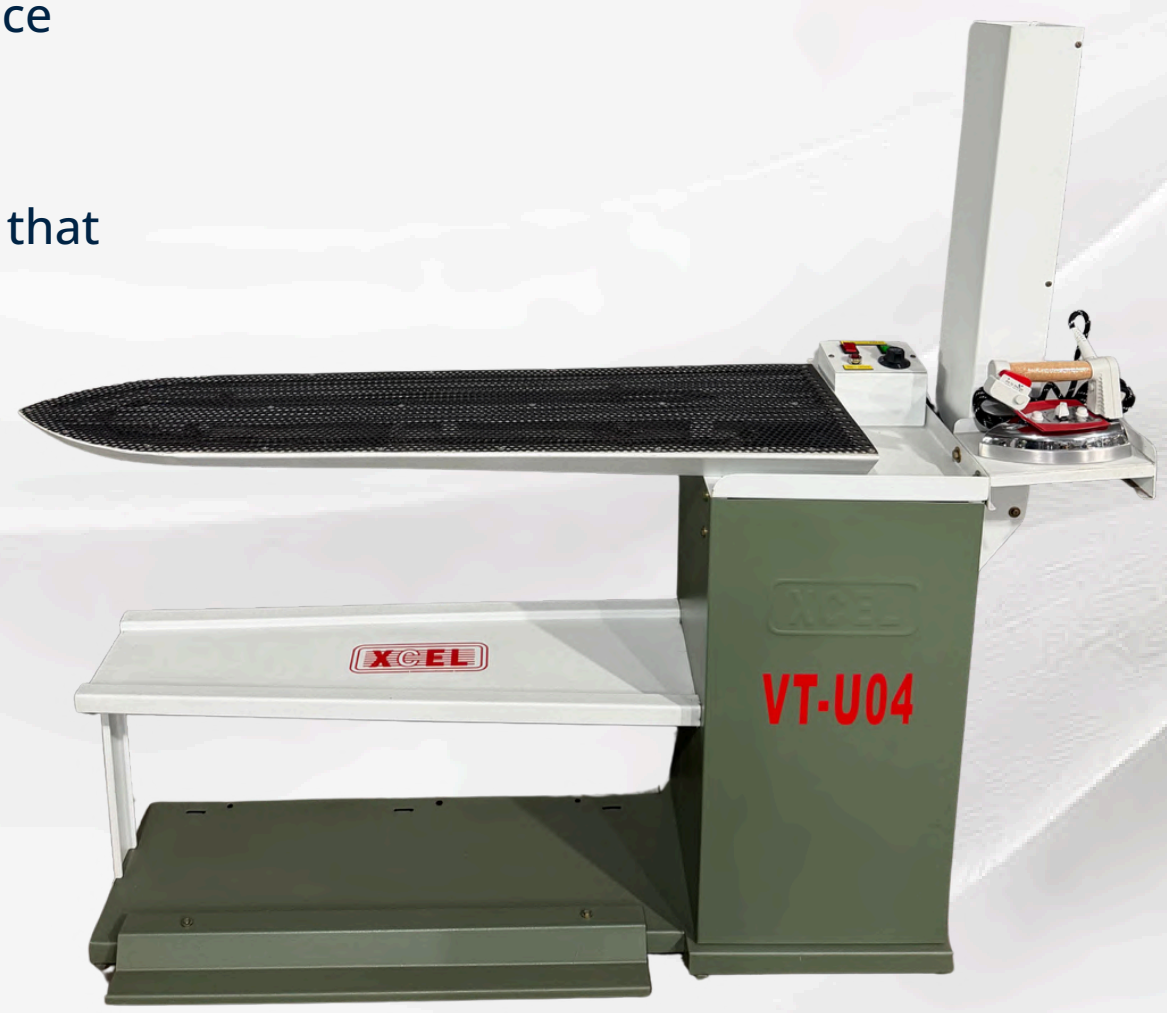

SPECIALISED PRESSING.

The XCEL Utility Ironing Table is designed for detailed garment finishing, particularly women's wear, dresses, frills and pleats. It comes with a specially shaped utility buck, combined with vacuum suction.

FEATURES

- Specialised utility buck for targeted pressing of dresses, frills, pleats based women garments.
- Table and buck dimensions configurable to meet specific garment-finishing requirements.
- Vacuum suction system draws the garment against the buck surface during pressing.
- Supplied with an imported iron that delivers professional results.
- Equipped with a dedicated chimney to channel humid air outside the ironing table.
- Integrated utility tray for convenient placement of garments.

GAS & DIESEL
WATER HEATER

CONTINUOUS OUTPUT. EFFICIENT FUEL UTILISATION.

The XCEL Gas & Diesel Water Heater delivers rapid, high-output heating for industrial & commercial laundries, providing a reliable supply with efficient fuel utilisation.

FEATURES

- Automatic Water Feed System maintains the required water level for uninterrupted operation.
- Thermal Insulation Jacket prevents heat loss from inner the tank, improving thermal efficiency.
- High-Efficiency Burners deliver rapid heat generation through industrial-grade gas or diesel burners.
- Pressure-release, dry-run cut-out and audible warning mechanisms for safe and reliable operation.
- Optional Condensate Separator removes residual moisture from the connected line, providing drier output to connected equipment.
- Easy-to-Use Control Panel for simple and convenient operation.
- Solid Inner Tank construction provides structural strength and reliable performance under continuous operating conditions.

ELECTRIC
WATER HEATER

CONTINUOUS OUTPUT. AUTOMATIC WATER REPLENISHMENT.

The XCEL Electric Water Heater delivers continuous, reliable heat for garment finishing, industrial & commercial laundry equipment, serving as a centralized uninterrupted heat source for multiple machines.

FEATURES

- Automatic water level control maintains the required tank level through continuous replenishment, eliminating manual refilling.
- High-performance electric heating elements deliver uniform heat output, throughout extended production hours.
- Unique vessel with optional built in condensate separator for completely dry output.
- Modular operation allows optimum power consumption.
- Detachable stainless steel elements are protected by thermostats.
- Various safety devices for high pressure control, built in release valve, dry cut out systems & buzzer.

PORTABLE
WATER HEATER

MANUAL WATER FEED. IDEAL FOR COMPACT OPERATIONS.

Portable Water Heater with easy manual water feed for single vacuum table operations in compact laundries and garment sampling applications.

FEATURES

- WHE-08, 10 Litres capacity Portable Ironing System.
- Incorporated with multiple level safety mechanism.
- Buzzer to indicate water level.
- Built in drainage system to avoid scale formation.
- Optional- Stainless Steel Body.
- Compact industrial design allows easy installation without occupying excessive floor space.

FABRIC INSPECTION MACHINE

INSPECT. ROLL. REWIND.

The XCEL Fabric Inspection Machine enables fabric inspection, measurement, rewinding and roll preparation with flexible configurations, multiple working widths, LED backlit illumination and variable-speed movement for different fabric types.

FEATURES

- Available in 72-inch, 96-inch & 120-inch working widths to accommodate different fabric sizes & production requirements.
- Bright, uniform backlighting and overhead lighting enable operators to easily detect stains, holes, faults & shade variations.
- Rubber pressed aligned roller for firm fabric grip.
- Dual-Purpose Machine for Inspection & Rolling in a single operation.
- Variable drive allows operators to control the speed of fabric, for detailed inspection or faster rewinding operations.
- Advanced Model supports Roll-to-Roll, Roll-to-Flap & Flap-to-Roll operation, providing greater flexibility across inspection & rewinding processes.
- Advanced Model supports edge to edge, aligned rolls for further processing or storage.
- Forward and reverse movement for convenient defect inspection.

FROM INSPECTION TO PERFECT ROLLS

QUALITY CHECK YOU CAN RELY ON.

XCEL

BUILT FOR PERFORMANCE.
ENGINEERED TO LAST.

OPTIONAL ADD-ONS

Configure your machine for specific fabric handling requirements.

FLAP ASSEMBLY

For Roll-to-Flap & Flap-to Roll Configuration

Fabric can be arranged into layered folds for organized handling and further processing.

ELECTRONIC EDGE CONTROL

For Precision Roll Alignment

Automatically controls fabric positioning during roll formation to achieve edge-to-edge alignment.

WHY CHOOSE AN XCEL FABRIC INSPECTION MACHINE?

HIGH-VISIBILITY INSPECTION
Uniform LED illumination for accurate defect detection

CONTROLLED FABRIC MOVEMENT
Variable speed with forward and reverse operation

EFFORTLESS ROLL HANDLING
Inspect and rewind heavy fabric rolls with reduced manual effort

SUPPORTS BUYER COMPLIANCE
Meet international buyer inspection and audit requirements

EASY SERVICING & MAINTAINANCE
Made for easy service and maintainance

HEAVY-DUTY CONSTRUCTION
Stable performance under continuous industrial operation

STAIN REMOVAL MACHINE

REMOVE STAINS. RESTORE APPEARANCE.

The XCEL Spot Removing Machine is a complete spotting workstation that combines steam gun, compressed air, vacuum suction, a spotting chemical gun and a swivel arm assembly for stain removal across wide range of garments.

FEATURES

- Comes with a 3-in-1 spotting workstation integrating steam, chemical gun & vacuum suction.
- Equipped with an air gun to blow away loosened dirt.
- Comes with an imported chemical application gun for dispensing of spotting agents.
- Comes with a flexible swivel spotting arm for easy access to sleeves, collars, cuffs, pockets & other intricate garment sections.
- Embedded with dual chemical box for the storage of spotting chemicals.
- Made up of 304 grade stainless steel for resistance against harsh chemicals.

STEAM REQUIRED
10 KG / HR

STAIN APPLICATIONS

The stains listed below are indicative only. Spot removal depends on the stain type, fabric, stain age & most importantly, the chemicals and techniques used.

OIL & GREASE BASED STAINS	WATER-BASED STAINS	CHEMICAL & INDUSTRIAL STAINS
Oil and grease	Tea, coffee and cold drink spills	Ink, ballpoint pen and marker
Cooking oil and food grease	Food and sauce	Rust and iron marks
Lipstick, wax and cosmetic	Sweat and deodorant marks	Dye transfer and colour bleeding
Shoe polish and leather care product marks	Blood stains	Adhesive and glue marks

THREAD SUCKING MACHINE

THREAD REMOVAL MADE FAST AND EFFICIENT.

The XCEL Thread Sucking Machine uses high-powered industrial suction and a wide-mouth intake to quickly remove loose threads from stitched garment areas without damaging fabrics or seams.

FEATURES

- Sensor-Activated suction automatically engages the suction system during garment handling, eliminating manual switching.
- Wide mouth opening for a greater garment coverage to remove threads with fewer handling movements.
- Vertical mounted motor in enclosed housing reduces noise, vibration and increase suction.
- Large Polycarbonate Viewing Window to provide clear visibility of garments.
- Heavy-duty vibration-dampening pads to improve machine stability.
- Comfortable working height and simple operation reduce operator fatigue.
- Suitable for thread removal across various types of garments.

STAINLESS STEEL **TROLLEY**

HYGIENIC HANDLING. SMOOTH MOBILITY.

The XCEL Stainless Steel Trolley is designed for the hygienic transport of linens, garments and laundry loads across commercial, industrial and institutional facilities.

FEATURES

- Entire trolley, including the frame, body and handle is fabricated from 304 grade stainless steel for exceptional corrosion resistance.
- Heavy-duty 360° swivel caster wheels provide effortless manoeuvrability, smooth movement and reliable load handling across the facility.
- Integrated tubular handle offers comfortable grip and excellent control even under full load.
- Smooth, fully welded joints enhance structural strength while eliminating sharp edges for safe and hygienic operation.
- Supplied fully assembled and ready for immediate use.
- Smooth, polished surfaces minimize dirt retention, allowing fast, effortless cleaning after every use.
